

What is Uni-Voice?

It is a free app that can give you text display or voice guidance in Japanese, English, Korean, or Chinese just by reading a Uni-Voice code.

 Uni-Voice

   Download on the App Store  GET ON Google Play  English 한국어
  中文 (简体字·繁体字)

If the text audio does not stream, check whether or not the automatic text reader function is on. Furthermore, if you are using an iOS device, the audio may stream by specifying the range of text and tapping the Speak button.
If you are using an iOS device: Settings > General > Accessibility > Speech > turn on "Speak Selection" and "Speak Auto-text".
If you are using an Android device: Settings > Languages & input > Text-to-speech output > turn on "Google Text-to-speech Engine".
Compatible models: iOS / iPadOS: Use version 16.0 or higher. Android / Use version 6.0 or higher.

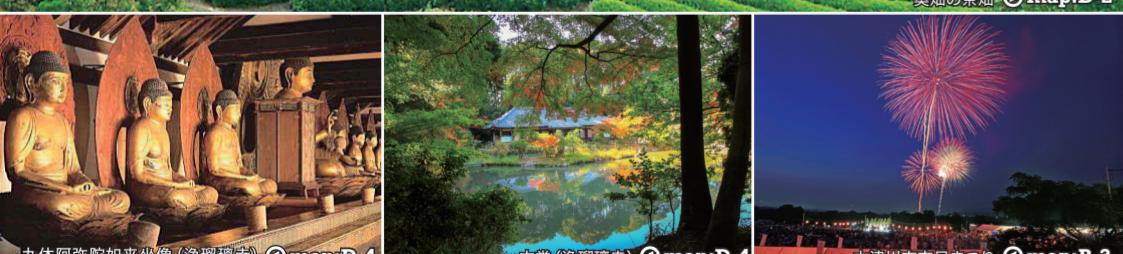

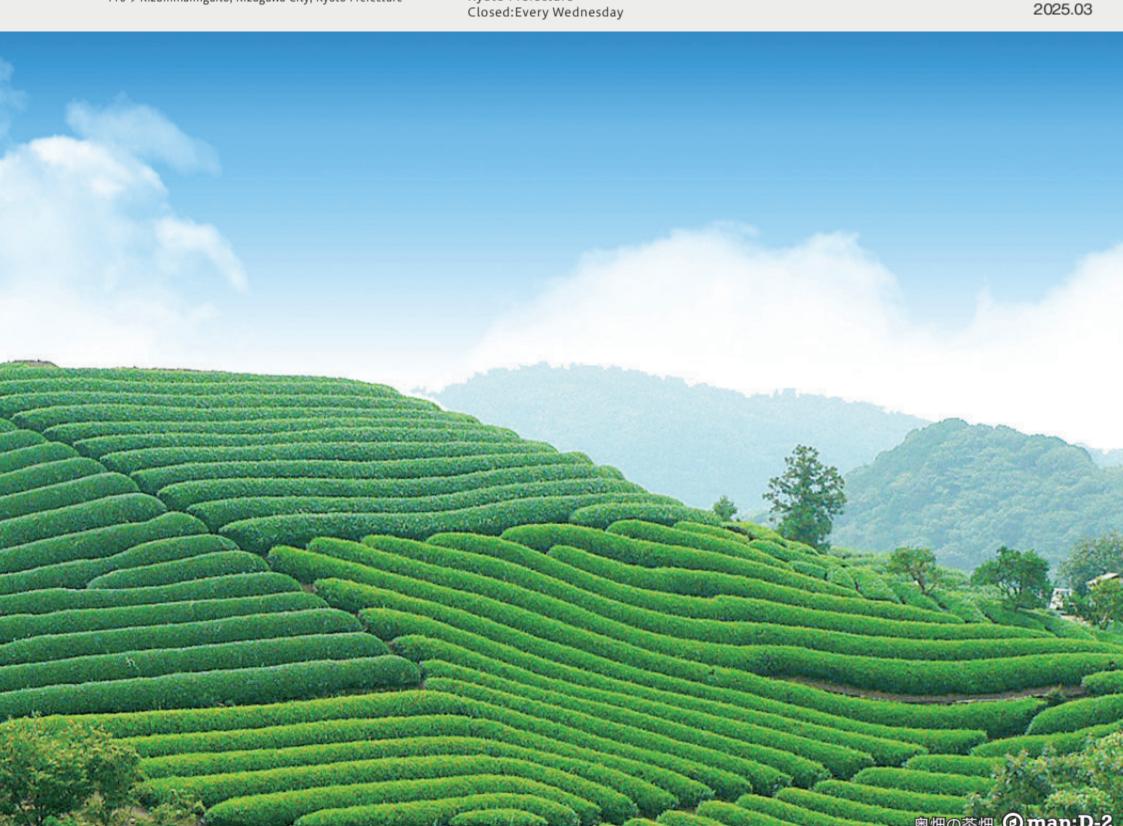

* Since this is a smartphone text-to-speech function, pronunciations may differ from actual Japanese pronunciations.
